

Praise for Abundance and the Secret Law of Attraction

"I received this book for free from [...] for my review. David Lowell grew up in Warwick, Rhode Island, USA and acquired two degrees one in Civil Engineering and German. He is married to Pamela David's message is to stay positive 24/7 and in his book he teaches more than just the law of attraction but how to stay positive in difficult situations we deal with every single day with examples.

"The ego is I in his book and True Self is separate from the mind and body, which is the principle behind life, action, feeling and thought."

It is important to know how our ego works in everyday life vs. the true self. What I love best is his example of learning how to do everything out of gratitude and in serving others so our ego doesn't get in our way. He also shows us how to smile "all the time" even if you are in a bad mood, because it turns the negativity into positive energy and changes the mood around us.

The real life examples can help anyone take a bad attitude and turn it into positive. For example, in dealing with others who are just down and out we need to send love to them. Just changing our karma to good will help the other person change around you or flee elsewhere. I know from experience that it works.

This book is not the same old "law of attraction" of ask, believe, receive and faith. It is much more in depth and helps the skeptics feel better about themselves and the world around them."

Jackie Paulson of Waukegan, Illinois

Freelance Editor

"I think "Abundance..." is the first non-fictional self-help type of book I was able to read from the first page to the last one. I usually give up after the first pages...I liked the direct approach of the author, the way he organized his discourse - how the stream of thoughts flow from one chapter to the other. The book attracts through its simplicity and that is what makes it powerful.

Mr. Lowell's book came into my life at the very moment I needed it and for this I am grateful. I would highly recommend it for anyone that is on the path of self-discovery and doesn't know where or how to start."

Tibi Glazer of Ashdod, Israel

"I really like the way the author uses real life examples and doesn't pretend there is a magical or quick fix for obtaining an abundant life. The book is written in a way anyone can understand and apply to whatever area of their life they'd like to improve.

I would recommend this book to anyone wanting to "stretch" their thinking and take realistic steps to improve their life."
